Homework 8

Solana Tokens

- 1. Follow the instructions from the lesson and use the spl-token-cli to create
 - a) A fungible token with a supply of 10,000
 - b) An NFT
- 2. Try sending these tokens to others in your team, and use the command line to find details about the tokens.
- 3. Try sending using both the transfer and transfer ——fund—recipient approach.

Solana Programs

Using the examples in the repo

- 1. Modify the existing msg! in example1-helloworld to log the program ID.
- 2. Retrieve the total program size of example1-helloworld.
- 3. Retrieve the lamport balance of example 2-counter.
- 4. Modify the client for example2-counter to feed an incorrect address for the greeting

account to the program.

hint use

solana account <ADDRESS>

to find out more about a given address content
